

**IRO Certificate #4599**

**NOTICE OF INDEPENDENT REVIEW DECISION**

August 13, 2002

**Re: IRO Case # M2-02-0950-01**

Texas Worker's Compensation Commission:

\_\_\_ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule 133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IRO's, TWCC assigned this case to for an independent review. \_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, \_\_\_ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Eligible in Orthopedic Surgery, who specializes in problems of the upper extremities. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to \_\_\_ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The \_\_\_ reviewer who reviewed this case has determined that, based on the medical records provided, the requested treatment is medically necessary. Therefore, \_\_\_ disagrees with the adverse determination regarding this case. The reviewer's decision and the specific reasons for it, is as follows:

History

This case involves a 49-year-old patient who developed impingement syndrome after a work injury on \_\_\_. She was treated conservatively with NSAID's injections and therapy. She continues with positive impingement signs.

Requested Service

Left Shoulder arthroscopy, rotator cuff repair

Decision

I disagree with the carrier's decision to deny the requested procedure.

Rationale

Surgery is now indicated as the patient has failed an adequate trial of nonoperative treatment.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
